SUMMARY

"Enthusiastic computer science student with a strong passion for learning and exploring new challenges. Eager to leverage a solid foundation in computer science, coupled with a proactive approach to acquiring new skills, to contribute effectively to dynamic and innovative projects. Committed to staying current with emerging technologies and embracing opportunities for continuous growth and professional development. A motivated team player with excellent communication skills, seeking to apply academic knowledge in a practical and impactful professional setting."

PROJECTS

Flight Booking with PHP

Self - Made • <https://github.com/baconty/Aeroplane-Website> • September 2023 - October 2023

- Led the end-to-end development of the Flight Booking web application, utilizing technologies such as HTML, CSS, and JavaScript for the front end.
- Implemented backend functionalities using PHP, including flight search algorithms, and booking confirmation processes.
- Ensured responsiveness across multiple devices, optimizing user accessibility on various platforms.

Simple Discord Bot

Self - Made • https://github.com/SleepyMiner/Discord_Bot • February 2023 - March 2023

- Implemented a Discord bot in Python utilizing various APIs to provide dynamic content, including the ability to generate and share random photos based on user-specified keywords.
 - Developed features that add a touch of humor to Discord channels by incorporating a random joke generator, enhancing user engagement, and fostering a lively community atmosphere.
 - Integrated inspirational quote retrieval functionality into the Discord bot, delivering uplifting and motivational messages on demand.
- Leveraged external APIs to ensure a diverse and enriching collection of quotes for users.
